

**Four Corners Air Quality Task Force**  
Guiding Principles  
DRAFT

Share the desire to work proactively to avoid future air quality impacts.

Acknowledge there are a wide range of perspectives that are involved.

Use sound scientific analysis as the basis for understanding air quality issues.

Open to all proposed ways to maintain and improve air quality.

Value the concept of adaptive management (i.e., modify action based on learning) in air quality management.

A balance between environmental, economic and social values is desirable.

A tiered approach may be useful to consider in the development of the options such as voluntary, permitting, regulatory.

Best available control technology?
